linkedin.com/in/jackson-pipe

Software developer with full-stack experience and graduate training in cybersecurity.

## Relevant experience

### Software Developer

Sep 2020 – Apr 2022

Niagara College · Academic client project

Led a five-person student team to build a React, Node.js, and MySQL business-management platform for a local client. Developed point-of-sale, inventory, ordering, authentication, payment, and invoicing features, refining the application through client feedback.

### Programming Instructor

Oct 2023 – Present

Code Ninjas · Code Sensei

Teach JavaScript, C#, and Lua through game and app development. Adapt lessons to each student and help them debug code and break down programming problems.

### Coding Instructor

Jun – Aug 2019

Self-employed

Designed and taught introductory Scratch, Python, and Java lessons for youth, adapting exercises to different skill levels.

## Education & certification

### Cyber Security Analytics

2025 – Apr 2026

Graduate Certificate · Mohawk College

Completed a cyberattack tabletop exercise and simulated attack-response labs, practising incident response in a controlled training environment.

### Azure Fundamentals (AZ-900)

2025

Microsoft Certified

Validated foundational knowledge of Azure services, cloud security, and governance.

### Computer Programming

2020 – 2022

Diploma · Niagara College

Studied software development, database design, and web application programming.

## Technical skills

**Development:** TypeScript, JavaScript, Python, C#, React, Next.js, Node.js, REST APIs

**Data & tools:** SQL, SQLite, MySQL, Microsoft Azure, Docker, Git / GitHub, Linux

**Security training:** Incident response, SIEM/log analysis, vulnerability assessment, network security, IAM, secure software development
